

❖ Quality

- ◆ Quality is fundamental for us.

The quality of our processes from the beginning

- ↪ **at the customer**
- ↪ **via marketing & sales**
- ↪ **through the development**
- ↪ **through the production**
- ↪ **back to our customer**

is a permanent requirement for our team and the customer's satisfaction the job grading of all our activities.

❖ Environmental requirements

- ◆ Our natural environment is important for us .

The certification according to DIN EN 14001 will not be implemented by MKT-Systemtechnik GmbH.

But due to our quality goals, we aspire a careful association with the environment.

We push ourselves to undertake all precautions and planings of protective actions and their realisation.

❖ Environmental requirements

What we are carrying out:

- the waste separation
- resource recycling (metall, plastic, paper, batteries and accumulators)
- elimination of harmful substances in products; e.g. bromine; lead,
- we established all the requirements for lead-less soldering.
- within our development process we choose compliant components and materials
- CFC free materials and packaging material which can be recycled by 100 %.
- the use of compliant adhesives.
- the use of compliant cleaning material.
- the maintenance and preservation of the companies area.
- medical precaution and coaching.
- support and coaching by an external agent for safety at work and environmental issues.
